

Loading completely

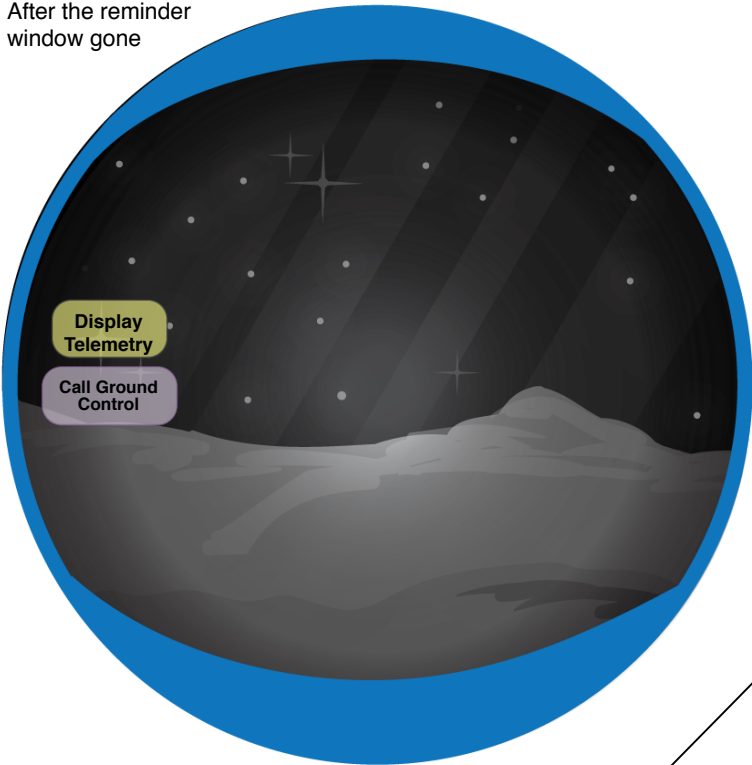

If loads successfully

If clicks square, Vitals info displays

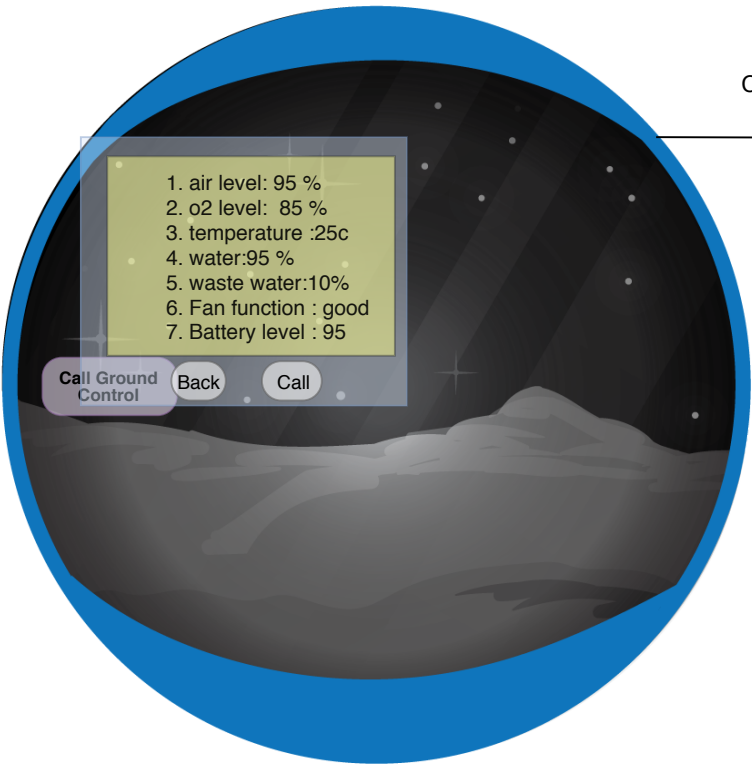

After the reminder window gone

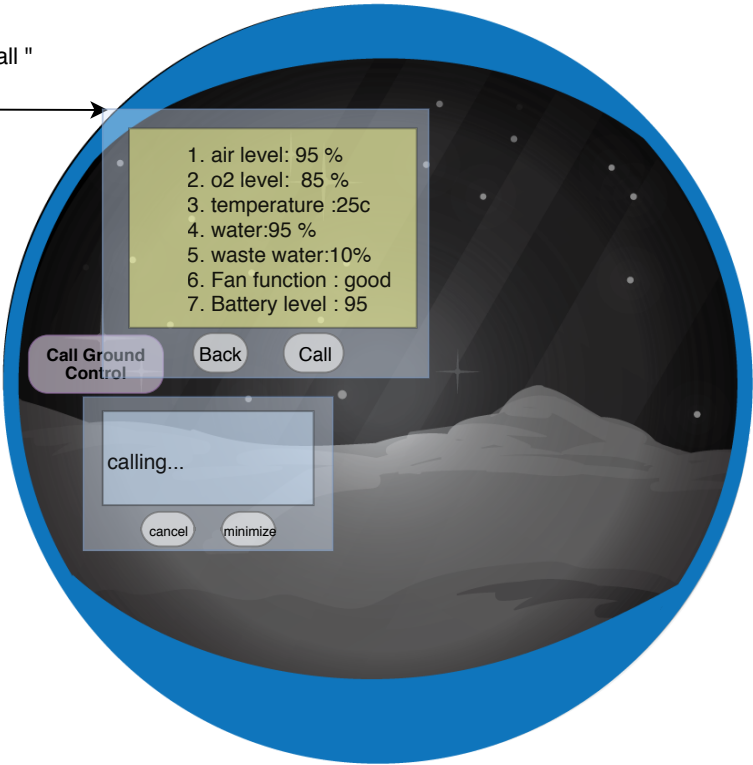

Click the yellow button

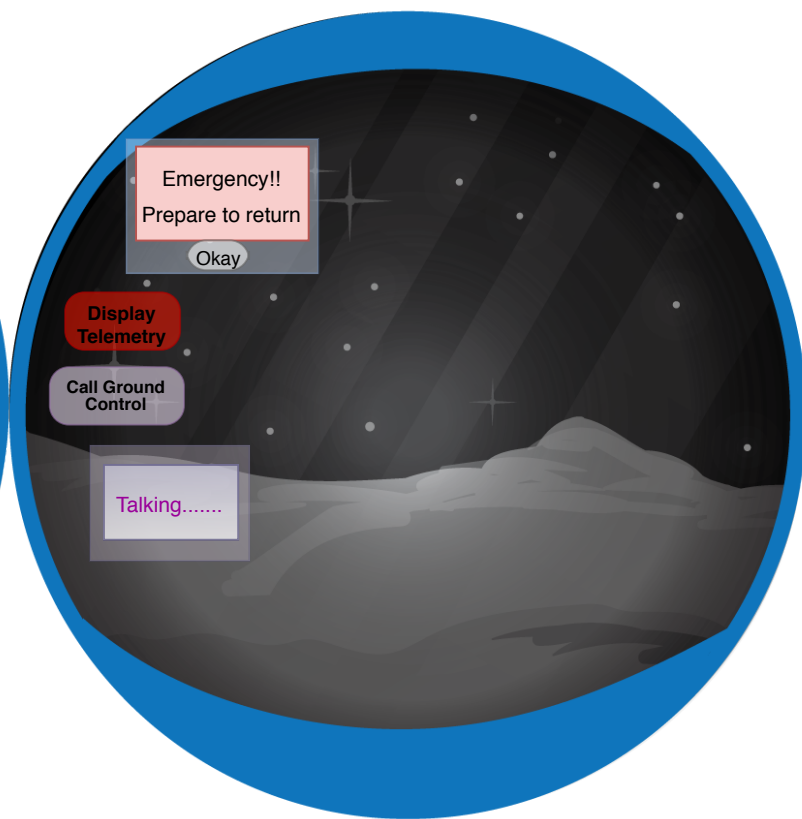

Click more. There are more clear information displays and can call the control people who are in charge

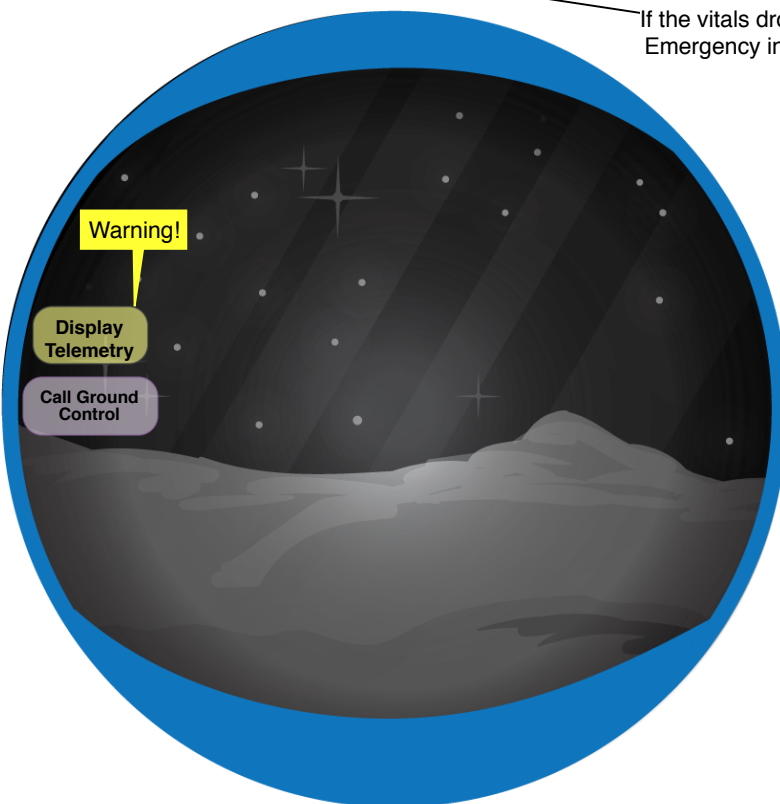

Click "call "

If one of vitals drops, the screen changes to yellow to warn and a reminder window shows up (will disappear then)

Emergency will force the astronaut to connect to the ground control

If the vitals drops too low, Emergency info displays
